PVFC Analysis Application Prototype

The prototype interface is enclosed in a large rectangular frame. On the left side, there are two distinct sections. The top section contains a rectangular box with the text "Find the product description whose price is as selected below?". Below this box are two radio buttons, each followed by the text "minimum" and "maximum" respectively. The bottom section contains another rectangular box with the text "Find total cost of products (including quantity) ordered by customers who live in the selected city?". Below this box is a drop-down list (DDL) with the text "Select City DDL" and a downward-pointing arrow icon. To the right of these input sections is a large, empty rectangular box with the text "Display Output Here..." at the top left corner.

Figure 1: PVFC Analysis Application Prototype

Develop an application with interface similar to the one shown in Figure 1 above.

It consists of two buttons, two radio buttons, a drop down list and any display control.

(a) The user will select either of the radio buttons and then click the button above radio buttons to get the desired result of query.

(b) The user after selecting a city will click the second button to find total cost of products ordered by customers in that city.
